EXPERIENCE

Project Engineer

Wipro

2022 - Present

- Designed and developed user interface components of an analytical website using React.js.
- Implemented several libraries like Chart JS, Framer Js and Material UI or ShadCN to enhance user Experience.
- Built reusable components and front-end libraries for future use.
- Created lots of customized hooks for api calls.
- Used firebase as an cloud messaging platform to notify client apps.
- Paired with other developers to fix and sort out different bugs and unimportant rerenders throughout the website.
- Learned SSR framework like NextJS, to reduce api response time and increase the Seo as well as the efficiency of the project.

Automation-Tester

Qdesq

2021 - 2022

- Learned to develop test plans, create and execute test cases, find and log bugs
- Built several test cases for several individual components and apis and used to run daily tests with the help of a auto selenium based testing software like test-project
- Gained immense experience on teamwork and collaboration skills.

Personal Projects

Share2Care

- A React-based website with firebase working as its backend and used firestore as the database(Also in MERN)
- A student community website for query solving and book sharing medium.

Exercise Routin APK

- A small Flutter-based mobile to-do based application exercise themed to keep counts on the amount of reps of sets for each exercises.
